

# What is the **Kazaa Revolution?**

## To Music, Movie and Game Fans

### **The way you get entertainment has changed.**

Across the globe a community has formed around technology that lets people search for, buy and share entertainment in a new way. 60 million people have already embraced peer-to-peer software, like Kazaa, as a new and better way to get their entertainment.

### **But you won't find it all on Kazaa yet.**

Some things you want to buy are not available because the major record and movie companies don't think you will pay, even though thousands of users are already buying music and games on Kazaa.

### **Because they think you are all pirates.**

We know you are passionate about music, movies and games. We believe that given the chance, you will pay a fair price to buy them on Kazaa.

### **You can help change things.**

This is your chance to tell the record and movie companies that they are wrong. That it's time they joined the revolution.

**The world of entertainment is changing.
